SUMMARY Skilled software engineer with a deep interest in connecting communities. Proven track record of working with cross-functional teams, solving challenges with process improvements, and developing innovative solutions to increase efficiency.

EXPERIENCE **Software Engineer, 100devs** 2022 - Present
Collaborated with a team of developers to build modern and responsive web applications using best practices

- Built 50+ semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management
- Maintained detailed documentation and git history for all projects

Projects:

- **Jam Status (Fullstack Web App)** - Music recommendation service and collaborative playlist generation to find your perfect vibe.
- **ASCMii (Fullstack Web App)** - Users can login and generate ascii art from any image. Users can save, retrieve and edit art from their personal gallery
- **Other Projects** - Clear Lake Casino Virtual Slot Machine, Mill Valley Mycological Society Mushroom identification web app, On-demand background color changer for partnered Twitch streamer, and many more

Technical Specialist - Vehicle Behavior, CRUISE 2020 - 2022

- Developed troubleshooting documentation for technical issues with Autonomous Vehicles
- Created Retrospective Process to summarize Major Issue Events for Operations and Engineering Teams
- Produced Bi-Weekly Report of Progressions and Regressions in AV Behavioral Trends

Full Stack Web Developer, New Albion Web 2018 - 2020

Created full stack web applications and static websites for different clients across small and medium size businesses. Also, consulted on SEO and social media strategy.

Clients Include

- *Cordon Bleu* - Local Vietnamese Restaurant website.

Technology Consulting Manager, ACCENTURE 2007 - 2017

Cloud & Data Center Transformation Lead. Managed and delivered multiple large-scale, cross-functional cloud readiness projects.

- Program Lead for the largest Amazon Web Services (AWS) migration by Accenture. The project scope consisted of 70 applications across 800 servers.
- Managed teams of 5-10 solutions architects and offshore resources
- Designed and executed cross-functional migration plans with business, application, IT, and external partner teams achieving \$15M in savings.
- Defined repeatable methodology, infrastructure design, and testing strategy to orchestrate client application portfolio's migration to AWS

EDUCATION **University of Pittsburgh** - Class of 2007
B.S. Computer Engineering - Swanson School of Engineering
